NORVIL

OXIGENO, our line of sustainable products made with organic and recycled fabrics.

Among the organic fabrics you will find organic cotton, grown and produced in an ecological way, that is, without using aggressive chemical agents and controlling the productive processes so that they are made in a sustainable way. These fabrics are GOTS certified (Global Organic Textile Standard).

Also we work with sustainable cotton which has the BCI Certificate (Better Cotton Initiative).

You can also find fabrics made of recycled polyester or second life fabrics, a fantastic option for those who are looking for a resistant fabric without giving up the care of our planet.

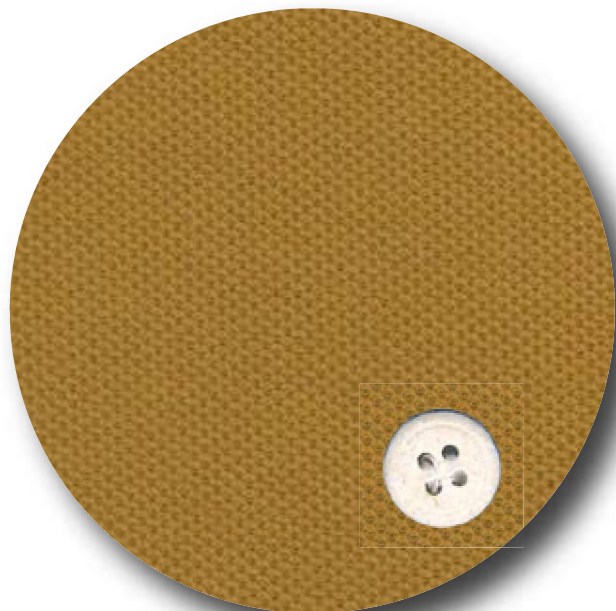

This collection's buttons are made with sustainable materials too, like organic cotton and recycled paper.

The performance, durability and advantages, including the high resistance and functional versasatility of our organic and recycled fabrics are the same as those of traditional fabrics, but with a minor environmental impact.

NORVIL

KNOWING BETTER OUR OXIGENO FABRICS

CANVAS

100% ORGANIC COTTON

Obtained in an ecological way,
without using aggressive chemical agents,
such as pesticides or dyes.

BUTTON

100% ORGANIC COTTON

POPLIN

100% ORGANIC COTTON

Obtained in an ecological way,
without using aggressive chemical agents,
such as pesticides or dyes.

KNOWING BETTER OUR OXIGENO FABRICS

KAPOK FIBER

93% ORGANIC COTTON - 7% KAPOK

Fiber obtained from an emblematic tree of latin America: Ceiba.

Its fruit contains a dense mass of fibers that can be transformed into threads:

- Light
- Provides soft texture to the fabric
- Excellent humidity control
- Resistant

KNOWING BETTER OUR OXIGENO FABRICS

RECYCLED POLYESTER TWILL

65% RECYCLED POLYESTER

35% SUSTAINABLE COTTON (WITH BCI CERTIFICATE)

Obtained from recycled plastic bottles and sustainable cotton with BCI (Better Cotton Initiative) Certificate.

KNOWING BETTER OUR TECHNICAL FABRICS

natura®

NATURA®

55% COTTON- 45% POLYESTER NATURA®

This fiber is part of our catalogue since long time.

Make moisture rapidly evaporate by concentrating it in its outer side. It is a color-lasting fiber and high-endurance.

Clothes do not need to be ironed, they show no deformation along its lifetime and they resist industrial washing.

KNOWING BETTER OUR TECHNICAL FABRICS

GOFRADO FIBER

85% POLYESTER - 15% ELASTOMER

Gofrado fiber is an excellent antibacterial material, light and fast dry.

CARBON FIBER

70% POLYESTER - 25% ELASTAN

5% CARBON FIBER

This fiber has many properties:

- Antiestatic
- Antibacterial
- Odorless
- Thermal regulator
- UV rays protector
